Hi Tim,

Since our center provided child care to the children who had ABC child care in the past year, recently we had an opportunity to receive a funding from the state ABC program to improve our child care quality. We received $6000.00 that can be used to install a shade structure in our one's & two's playground to meet Health & Safety requirements. However the quote from the playground company is $8500 for the 20 X 30 shade structure. I am wondering whether we can get help from the city for the funding that is short to get this project done.

A shade structure in the playground is significantly needed for the health concerns. Our center has been looking into the possibilities to install one for many years. Last year, the city said that they might be able to build us one but the city have been very busy with other projects. Without the shade, often time we are marked with low scores on playground health and safety by the state monitor. We are very excited that now we got $6000 funding. It will be great if City of Clemson can help us with $2500.00 to make it possible to provide shades to young children when they are playing outdoors.

I would greatly appreciate it if City Council can take this need into consideration. Please let me know how I can proceed to make the funding request.

Thank you,

Sharon Hwu, Director

Clemson Child Development Center

Rick,
Should I do an agenda item request on this or have her speak with Tim Fowler to see how to proceed? I know Council isn't crazy about getting requests like this out of the budget cycle so I thought I'd check with you first. It is good to see she has the majority of the money she needs from another partner.

Andy,
Here is the the quote for the 20x30 shade structure.
The total cost is $8500. We have $6000 funding from the state ABC program that I can apply to the shade. A shade structure for the one's and two's playground has been on our top need to improve health and safety. Please let me know how to proceed to request city to help us by matching $2500.
Thank you!

Sharon-

Shade delivery is 6 weeks after order. It will take 4-5 days to install the shade. They set the frame, wait 72 hrs then install the fabric. Please call me with any questions.

Thank you!
